

### DESCRIPTION

NiniX Technologies helps its customers with full spectrum design and development all the way up to in-house manufacturing of robust and reliable electronics suitable for harsh environment under IATF and ISO-13485 certificates. Our machine building division then automates these customer specific series productions.

### MAJOR PRODUCTS / SERVICES

- Full product development & manufacturing of electronic products for harsh environments.
- Contract manufacturing for sealing of electronics.
- Engineering of equipment and automated assembly lines for precision applications and industrial sectors.

### KEY BENEFITS

01

We know about sealing electronics: unique pretreatment, coating, gluing & potting technologies

02

We take care of your project from start till production

03

We bring extensive knowledge and expertise in reliability

### WHY US

- 20+ years expertise in robust solutions
- Strict, milestone driven development processes
- One-stop shop from idea to production
- Part of a solid engineering group of companies with complementing expertise

### NiniX Technologies

We help you with **custom product development & manufacturing from A to Z**, with a particular focus on making electronics robust and reliable under all extreme conditions.

### Product development

- 01 **Sensors and electronic modules**
- 02 **Extreme environments**
- 03 **Agile in-house manufacturing**

### NiniX Technologies

We help you with **custom engineered automation solutions** based on a user friendliness and robustness first philosophy.

### Machine development

- 01 **Robotic assembly lines**
- 02 **Precision dosing applications**
- 03 **Automated test & measurement set ups**
